

PICTET ASSET MANAGEMENT

Pictet - Robotics

Sustainability-related Website Disclosure (SFDR)

2025-10-08

LEGAL ENTITY IDENTIFIER: 549300SVYNI47OIC3C69

This document provides disclosure requirements according to Article 10 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability-related disclosures in the financial services sector (SFDR), for the financial products referred to in Article 8 of the Regulation.

SUMMARY

This fund:

Complies with Article 8 of SFDR.

Takes into account sustainability risks. (1)

Promotes environmental or social characteristics and seeks to mitigate "Principal Adverse Impacts".

Applies exclusion criteria related to weapons, fossil fuels, addictive products and companies in breach of international norms. (2)

Upholds good corporate governance practices.

Conducts engagement and, where relevant, exercises voting rights.

Notes:

(1) Sustainability risks include climate transition, physical and other environmental risks, social risks and governance risks.

(2) Pictet Asset Management retains full discretion over the implementation of exclusion criteria and reserves the right to deviate from third-party information on a case by case basis. For passive strategies, exclusions are implemented on a best effort basis, and for those following an ESG index, exclusions are defined by the index provider.

The decision to invest in the promoted fund should take into account all the characteristics or objectives of the promoted fund as described in its prospectus.

For more information on ESG classification, sustainability risks and exclusions, please refer to the [Pictet Asset Management Responsible Investment Policy](#).

1. No sustainable investment objective

The fund promotes environmental or social characteristics but does not have sustainable investment as its objective. The fund intends to partially invest in securities financing economic activities that substantially contribute to the environmental and/or social objectives.

2. Environmental or social characteristics of the financial product

The fund focuses on positive environmental and social impacts by investing mainly in companies involved in robotics, automation, and enabling technologies. These investments aim to enhance resource efficiency, reduce environmental impacts, and address productivity challenges due to demographic changes. The fund excludes issuers with severe breaches of international norms and engages actively with company management on material ESG issues.

3. Investment strategy

The investment manager integrates ESG factors into a fundamental analysis framework, selecting companies with favorable growth prospects that contribute to environmental and social objectives. The strategy emphasizes avoiding harmful activities and engaging with companies to improve ESG practices. Investments are predominantly in companies that advance automation, robotics, and enabling technologies, with a significant portion of revenue derived from these activities.

4. Proportion of investments

At least 80% of the fund's investments align with E/S characteristics, with at least 51% allocated to sustainable investments. The remainder supports other E/S characteristics.

5. Monitoring of environmental or social characteristics

Our Compliance department monitors on an ongoing basis the binding elements of the fund to ensure that these are met throughout the lifecycle of the fund.

6. Methodologies for environmental or social characteristics

The fund uses several indicators to monitor its ESG impact, including the percentage of exposure to sustainable investments, overall ESG profile, and PAI indicators. It also tracks engagement activities and the exercise of voting rights to ensure alignment with ESG objectives.

7. Data sources and processing

Pictet Asset Management utilizes data from specialized ESG providers, supplemented by internal analysis. Data quality is ensured through automated alerts and manual reviews, with daily updates feeding into internal systems.

8. Limitations to methodologies and data

While ESG data coverage is expanding, limitations include incomplete data from issuers. We address such limitations on constantly monitoring potential new relevant data set from providers.

9. Due diligence

Service providers are subject to rigorous due diligence supervised by the Pictet Group ESG Data Committee and covering topics such as review of their business model, research process, technical expertise, data coverage, quality assurance mechanisms, and prevention of conflicts of interests.

10. Engagement policies

We engage on behalf of our long only, managed equity and debt holdings. Our engagement activities include a combination of targeted in-house-led discussions, collaborative institutional investor initiatives, and third-party engagement services.

11. Designated reference benchmark

No specific ESG index has been designated.

NO SUSTAINABLE INVESTMENT OBJECTIVE

The fund promotes environmental or social characteristics but does not have as its objective sustainable investment.

The fund intends to partially invest in securities financing economic activities that substantially contribute to the environmental and/or social objectives.

The fund considers principal adverse impacts (PAIs) on sustainability factors through the exclusion of issuers associated with controversial conduct or activities. Exclusions allow the fund to remove economic activities and behaviours towards international norms that have high adverse impacts on society or the environment. How exclusions map to PAIs and their related indicators is set out in Pictet Asset Management's Responsible Investment policy.

The fund excludes issuers that are subject to high or severe controversies in areas such as human rights, labour standards, environmental protection and anti-corruption, or in breach of UN Global Compact Principles or OECD Guidelines for Multinational Enterprises.

The fund considers an investment sustainable if it does no significant harm to any E/S objective, which the investment team determines by applying exclusions. Exclusions allow the fund to remove economic activities and behaviours towards international norms that have high adverse impacts on society or the environment. Please refer to Pictet Asset Management's Responsible Investment policy for further details on excluded sectors and behaviours and exclusion thresholds.

ENVIRONMENTAL OR SOCIAL CHARACTERISTICS OF THE FINANCIAL PRODUCT

- **Positive impact:**

The fund seeks to achieve a positive environmental and/or social impact by investing mainly in companies providing robotic applications, automation solutions or enabling technologies.

The fund invests mainly in companies whose significant proportion of their activities are related to products and services contributing to sustainable economic growth by improving companies' use of resources, improving the quality of their goods and services, reducing their environmental impact, and helping companies to compensate for the loss of productivity due to population ageing, in particular in the areas of, but not limited to, robotics applications and components, automation, autonomous systems, sensors, microcontrollers, 3D printing, data processing, actuation technology as well as image, motion or voice recognition and other enabling technologies and software, and other relevant economic activities.

No reference index has been designated for the purpose of attaining the environmental or social characteristics promoted by the fund.

- **Norms- and values-based exclusions:**

The fund excludes issuers that are in severe breach of international norms or have significant activities with adverse impacts on society or the environment.

- **Active ownership:**

The fund methodically exercises its voting rights. The fund may also engage with the management of companies on material ESG issues and may discontinue investment if progress proves unsatisfactory.

- **Objectives of the sustainable investments that the fund mainly intends to make**

The fund mainly invests in securities financing economic activities that substantially contribute to environmental or social objectives such as:

- Environmental
 - De-carbonisation
 - Efficiency & Circularity
 - Natural Capital Management
- Social
 - Healthy Life
 - Water, Sanitation & Housing
 - Education & Economic Empowerment
 - Security & Connectivity

INVESTMENT STRATEGY

In actively managing the fund, the investment manager uses fundamental company analysis to select securities that it believes offer favourable growth prospects at a reasonable price. The investment manager considers ESG factors a core element of its strategy by seeking to invest mainly in economic activities that contribute to an environmental and social objective whilst avoiding activities that adversely affect society or the environment. Voting rights are methodically exercised and there may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy, SFDR product category Article 8. The portfolio composition is not constrained relative to the benchmark, so the similarity of the fund's performance to that of the benchmark may vary.

The fund's binding elements include:

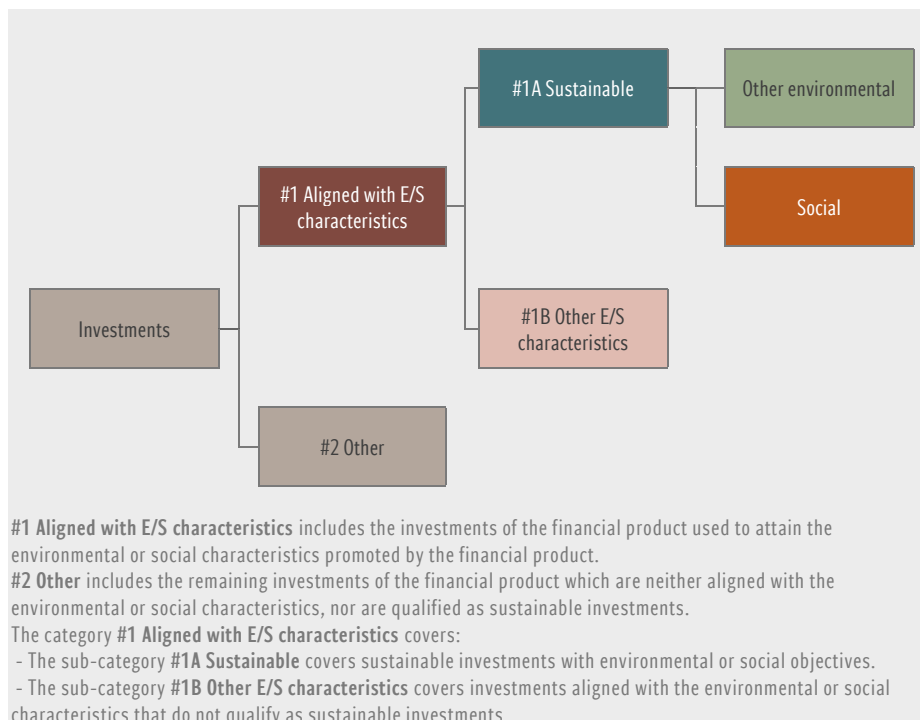

- at least 51% of sustainable investments, i.e. investments in companies that have a significant exposure to activities that contribute to sustainable economic growth through automation, robotics systems and enabling technologies (as measured by revenue, enterprise value, earnings before interest and tax, or similar)
- exclusion of issuers that:
 - are involved in the production of controversial weapons including anti-personnel mines, cluster munitions, biological and chemical weapons, nuclear weapons and depleted uranium
 - derive a significant portion of their revenue from activities detrimental to society or the environment such as thermal coal extraction. Please refer to Pictet Asset Management's Responsible Investment policy for further details on excluded activities and revenue thresholds.
 - severely violate the UN Global Compact principles on human rights, labour standards, environmental protection and anti-corruption
- the exclusions for EU Paris-aligned Benchmarks
- a better ESG profile than the reference index
- ESG criteria analysis of eligible securities that covers at least 90% of net assets or the number of issuers in the portfolio

The good governance practices criteria apply to issuers of all corporate investments of the fund. To determine whether a company meets minimum requirements for good

governance practices under SFDR, Pictet Asset Management ensures that companies it invests in do not have severe controversies or UN Global Compact breaches that are linked to various topics including sound management, employee relations, remuneration of staff and tax compliance. How breaches to UNGC principles and severe controversies map to good governance practices is set out in Pictet Asset Management's Responsible Investment policy.

PROPORTION OF INVESTMENTS

The fund is at least 80% aligned with E/S characteristics (#1 Aligned with E/S characteristics) and up to 20% invested in Other (#2 Other). At least 51% are allocated to Sustainable investments (#1A Sustainable) and the remainder will be invested in investments aligned with other environmental and/or social characteristics (#1B Other E/S characteristics).

- Pictet Asset Management uses a proprietary framework to define sustainable investments. Sustainable investments are calculated on a pass/fail basis including labelled bonds, general bonds from countries that reduce CO2 emissions or implement policies that may lead to meaningful improvement in reducing CO2 emissions, and securities from issuers with at least 20% combined exposure (as measured by revenue, EBIT, enterprise value or similar metrics) to economic activities that contribute to environmental or social objectives. Please refer to Pictet Asset Management's Responsible Investment policy for further details on our Sustainable Investment Framework.
- Whilst the fund includes achieving a positive environmental or social objective, its investment policy does not target specifically EU Taxonomy aligned investments as defined by the technical screening criteria of the Taxonomy Regulation.

MONITORING OF ENVIRONMENTAL OR SOCIAL CHARACTERISTICS

Our Compliance department monitors on an ongoing basis the binding elements (referred to in the Investment strategy section) of the fund to ensure that these are met throughout the lifecycle of the fund.

METHODOLOGIES FOR ENVIRONMENTAL OR SOCIAL CHARACTERISTICS

Indicators the fund uses include:

- The percentage of the financial product's exposure to "sustainable investments" as defined in Article 2 (17) of SFDR
- Overall ESG profile
- Principal Adverse Impact (PAI) indicators such as exposure to issuers that are in severe breach of international norms or have significant activities with adverse E/S impacts on society or the environment
- The percentage of eligible company meetings where voting rights were exercised
- Engagement with companies

DATA SOURCES AND PROCESSING

Pictet Asset Management has selected a range of specialist providers for ESG data to support our firm-wide ESG integration and active ownership activities. Data received from external providers may be complemented by internal research and analysis provided by our Investment teams and ESG specialists.

Pictet Asset Management's main ESG data providers can be found in our Website by following this [link](#).

What are the measures taken to ensure data quality?

Quality issues trigger automated alerts, which are followed by manual reviews from our data and ESG analysts/specialists, and where necessary, by engagements with third-party ESG data providers. Additionally, we perform momentum analysis on different ESG data to better identify risks and opportunities.

How is data processed?

ESG data are updated daily in our internal data warehouse and are made available to our investments teams through various systems, such as our internal ESG Scorecard, Portfolio Management System, and Tableau dashboards.

What proportion of data is estimated?

Although we prioritise reported data over estimated data, we do rely on estimations to some extent, where reported data are not available. Data reported by companies and regulatory authorities are prioritised over estimated data from external providers and ranked higher in terms of reliability for investment and active ownership activities.

The proportion of estimated data varies depending on the ESG indicator. For example, for GHG emissions scope 1 and 2, around 80% of the data is reported, while the majority of scope 3 emissions are estimated.

LIMITATIONS TO METHODOLOGIES AND DATA

Any limitations to the methodologies

Key limitations to our methodologies may include a lack of data coverage. Our methodologies are informed by reliable sources gathered from diverse reputable third-party research providers that are experts in their areas.

In cases where the information from third-party providers is deemed incorrect or incomplete, we retain the right to engage with them or to deviate, on a case-by-case basis.

How such limitations do not affect the objective of the fund

ESG data availability is continually improving, and we are leveraging more and more on our data using information from different providers. However, certain data may not be available for all issuers in the fund or benchmark, which means that ESG indicators provided at the portfolio level may not be fully representative. Therefore, it is important to consider coverage ratios when interpreting the levels of ESG indicators. At the portfolio and index level, an ESG indicator is considered significant if we have coverage on more than 50% of eligible assets (in-scope instruments).

Actions taken to address such limitations

We address such limitations on constantly monitoring potential new relevant data set from providers.

DUE DILIGENCE

Service providers are subject to rigorous due diligence supervised by the Pictet Group ESG Data Committee and covering topics such as review of their business model, research process, technical expertise, data coverage, quality assurance mechanisms, and prevention of conflicts of interests. In addition to external ESG data, the Committee approves and oversees the development of in-house ESG data infrastructure and the annual ESG data budget.

The existing list of ESG Data providers is subject on an ongoing revision for data quality, coverage and other attributes. As a consequence, if the outcomes of the due diligence are not satisfactory and we face repetitive data quality issues we can close the contract we have in place with them.

More information about the external data sources used is available upon request.

Our due diligence process of issuers covers the following points:

- The clarity and robustness of the issuer's long-term strategy.
- The functioning and caliber of governance structures and effective leadership.
- The financial strength and performance of issuers and the fair valuation of underlying securities.
- Sustainability risks & opportunities and adverse impacts of potential investments on society and/or the environment.

**ENGAGEMENT
POLICIES**

We consider it our fiduciary duty to engage selected corporate issuers in order to positively influence a company's ESG performance and to protect or enhance the value of our clients' investments. We press management to adopt appropriate policies, practices and disclosure in line with established best practice but focus on those that lag behind or where accidents or events bring to light structural weaknesses in their governance and/or management of environmental and social issues. Interaction with issuers take the form of one-to-one discussions, shareholder/bondholder meetings, investor roadshows and/or conference calls. The objectives of these interactions are to assess an organization, monitor that their strategy is being implemented in line with our expectations and ensure that issuers are on track to meet their goals and objectives.

We engage on behalf of our long only, managed equity and debt holdings. Our engagement activities include a combination of targeted in-house-led discussions, collaborative institutional investor initiatives, and third-party engagement services.

Collaborative initiatives we participate in include Ceres Valuing Water Finance, Nature Action 100 and FAIRR.

Engagement targets may be identified independently by investment teams, or as part of our Group Engagement Focus program, a group-level engagement initiative that focuses on issues such as climate change, nature, long-termism and breaches of global norms.

Our [Pictet Climate Action Plan](#), which includes our commitment to net zero by 2050 as well as interim science-based targets, also drives some of our engagement activity as we use active ownership to make progress against our climate targets. More detailed information on engagement and proxy-voting policies activities can be found in [Pictet Asset Management's Responsible Investment Report](#) and [Responsible Investment Policy](#).

**DESIGNATED
