Site web Informations en matière
de durabilité (SFDR)

20/10/2025

LEGAL ENTITY IDENTIFIER: 549300M2254XJ2ZJD015

Le présent document fournit les exigences en matière d'informations conformément à l'article 10 du Règlement (UE) 2019/2088 du Parlement Européen et du Conseil du 27 novembre 2019 sur la publication d'informations en matière de durabilité dans le secteur des services financiers (SFDR), pour les produits financiers visés à l'article 8 du Règlement.

RÉSUMÉ

Ce fond:

Est conforme à l'article 8 du SFDR.

Prend en considération les risques en matière de durabilité. (1)

Promeut les caractéristiques environnementales ou sociales et cherche à atténuer les "Principales incidences négatives".

Applique des critères d'exclusion liés aux armes, aux combustibles fossiles, aux produits addictifs et aux entreprises qui violent les normes internationales. (2)

Respecte les bonnes pratiques en matière de gouvernance d'entreprise.

Mène un dialogue collaboratif et, lorsque cela s'avère pertinent, exerce des droits de vote.

Notes:

(1) Les risques en matière de durabilité comprennent la transition climatique, les risques physiques et autres risques environnementaux, les risques sociaux et les risques liés à la gouvernance.

(2) Pictet Asset Management conserve un pouvoir discrétionnaire absolu sur l'application des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas. Pour les stratégies passives, les exclusions sont mises en œuvre sur une base dite best effort, et pour celles qui suivent un indice ESG, les exclusions sont définies par le fournisseur de l'indice.

La décision d'investir dans le fonds promu doit tenir compte de toutes les caractéristiques ou de tous les objectifs de celui-ci, tels que décrits dans son prospectus.

Pour de plus amples informations sur la classification ESG, les risques en matière de durabilité et les exclusions, veuillez consulter la [Politique d'investissement responsable de Pictet Asset Management](#).

1. Sans objectif d'investissement durable

Le fonds promeut des caractéristiques environnementales ou sociales mais n'a pas pour objectif l'investissement durable.

2. Caractéristiques environnementales ou sociales du produit financier

Le fonds vise à améliorer son profil ESG en augmentant le poids des titres présentant de faibles risques en matière de durabilité et en diminuant ceux présentant un risque élevé par rapport à un portefeuille neutre avec une note de risque ESG moyenne. Il exclut les émetteurs qui violent gravement les normes internationales ou qui ont une incidence négative sur la société ou l'environnement. Le fonds s'engage activement auprès de la direction des entreprises sur les questions ESG importantes et peut interrompre ses investissements si les progrès en matière d'ESG ne sont pas satisfaisants.

3. Stratégie d'investissement

Le gestionnaire d'investissement utilise l'analyse des marchés et des émetteurs pour sélectionner des titres alignés sur les tendances des taux d'intérêt et qui présentent de faibles risques en matière de durabilité, en appliquant des contrôles de risque stricts. La stratégie comprend une approche à tendance positive visant à surpondérer les titres présentant des profils ESG favorables. La performance du fonds peut s'écarter de l'indice de référence en raison de la composition non limitée de son portefeuille.

4. Proportion d'investissements

Au moins 70% des investissements du fonds sont alignés sur des caractéristiques environnementales ou sociales, et jusqu'à 30% sont investis dans d'autres titres.

5. Contrôle des caractéristiques environnementales ou sociales

Notre département Conformité surveille en permanence les éléments contraignants du fonds afin de veiller à ce qu'ils soient respectés tout au long du cycle de vie du fonds.

6. Méthodes

Le fonds utilise des indicateurs ESG tels que le profil ESG global et les indicateurs de Principales incidences négatives (PIN), qui évaluent l'exposition aux émetteurs qui violent gravement les normes ou qui ont une incidence négative importante sur la société ou l'environnement. Il surveille également les activités d'engagement auprès des entreprises.

7. Sources et traitement des données

Pictet Asset Management utilise des données provenant de fournisseurs ESG spécialisés, complétées par une analyse interne. La qualité des données est assurée par des alertes automatisées et des révisions manuelles, les mises à jour quotidiennes alimentant les systèmes internes.

8. Limites aux méthodes et aux données

Bien que la couverture des données ESG s'étende, les limites sont notamment les données incomplètes fournies par les émetteurs. Nous remédions à ces limites en surveillant en permanence les nouvelles séries de données pertinentes potentielles des fournisseurs.

9. Diligence raisonnable

Les fournisseurs de données ESG sont soumis à une diligence raisonnable rigoureuse supervisée par le Comité des données ESG du Groupe Pictet et couvrant des sujets tels que la révision de leur modèle économique, de leur processus de recherche, de leur expertise technique, de la couverture des données, des mécanismes d'assurance qualité et de la prévention des conflits d'intérêts.

10. Politiques d'engagement

Nous menons un dialogue collaboratif (engagement) pour le compte de nos positions en actions et en dette longues uniquement et gérées. Nos activités en matière d'engagement combinent des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

11. Indice de référence désigné

Aucun indice ESG spécifique n'a été désigné.

NO SUSTAINABLE INVESTMENT OBJECTIVE

The fund promotes environmental or social characteristics but does not have as its objective sustainable investment.

ENVIRONMENTAL OR SOCIAL CHARACTERISTICS OF THE FINANCIAL PRODUCT

- **Positive tilt:**

The fund seeks to increase the weight of securities with low sustainability risks and/or decrease the weight of securities with high sustainability risks, resulting in a better environmental, social and governance (ESG) profile than a neutral portfolio. A neutral portfolio would have an average ESG Risk rating of "medium".

No reference index has been designated for the purpose of attaining the environmental or social characteristics promoted by the fund.

- **Norms- and values-based exclusions:**

The fund excludes issuers that are in severe breach of international norms or have significant activities with adverse impacts on society or the environment.

- **Active ownership:**

The fund may engage with the management of companies on material ESG issues and may discontinue investment if progress proves unsatisfactory.

INVESTMENT STRATEGY

In actively managing the fund, the investment manager uses a combination of market and issuer analysis to identify those securities that offer the best performance in light of interest rate trends. The fund's management approach uses strict risk controls. The investment manager considers ESG factors a core element of its strategy by adopting a tilted approach which seeks to increase the weight of securities with low sustainability risks and/or to decrease the weight of securities with high sustainability risks, subject to good governance practices. Activities that adversely affect society or the environment are also avoided. There may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy, SFDR product category Article 8. The portfolio composition is not constrained relative to the benchmark, so the similarity of the fund's performance to that of the benchmark may vary.

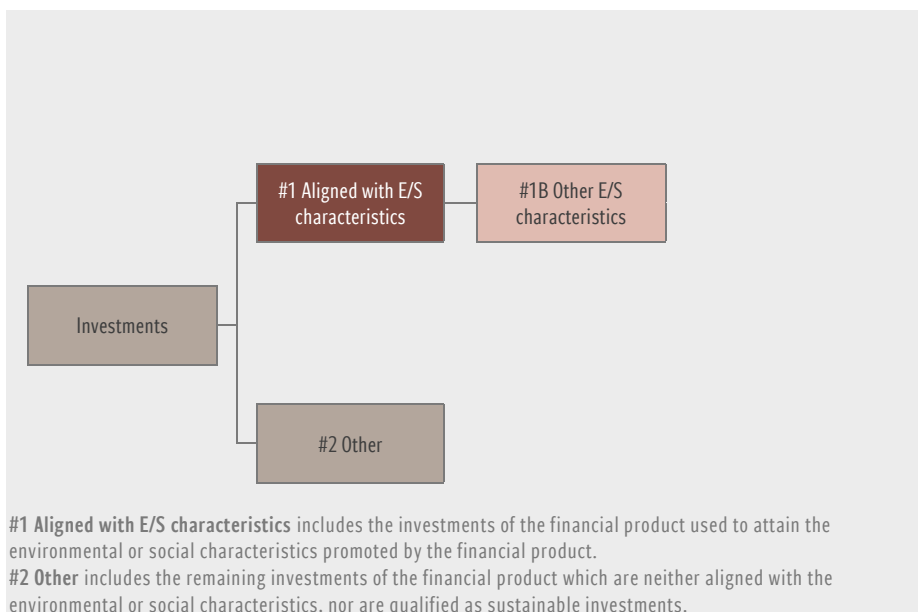

The fund's binding elements include:

- exclusion of issuers that:
 - are involved in the production of nuclear weapons in countries that are not signatories to the Treaty on the Non-Proliferation of Nuclear Weapons (NPT), and in the production of other controversial weapons
 - derive a significant portion of their revenue from activities detrimental to society or the environment such as thermal coal extraction. Please refer to Pictet Asset Management's Responsible Investment policy for further details on excluded activities and revenue thresholds.
 - severely violate the UN Global Compact principles on human rights, labour standards, environmental protection and anti-corruption
- overweight securities with low sustainability risks
- ESG criteria analysis of eligible securities that covers at least 80% of net assets or the number of issuers in the portfolio

The good governance practices criteria apply to issuers of all corporate investments of the fund. To determine whether a company meets minimum requirements for good governance practices under SFDR, Pictet Asset Management ensures that companies it invests in do not have severe controversies or UN Global Compact breaches that are linked to various topics including sound management, employee relations, remuneration of staff and tax compliance. How breaches to UNGC principles and severe controversies map to good governance practices is set out in Pictet Asset Management's Responsible Investment policy.

PROPORTION OF INVESTMENTS

The fund is at least 70 % aligned with E/S characteristics (#1 Aligned with E/S characteristics) and up to 30% invested in Other (#2 Other).

MONITORING OF ENVIRONMENTAL OR SOCIAL CHARACTERISTICS

Our Compliance department monitors on an ongoing basis the binding elements (referred to in the Investment strategy section) of the fund to ensure that these are met throughout the lifecycle of the fund.

METHODOLOGIES FOR ENVIRONMENTAL OR SOCIAL CHARACTERISTICS

Indicators the fund uses include:

- Overall ESG profile
- Principal Adverse Impact (PAI) indicators such as exposure to issuers that are in severe breach of international norms or have significant activities with adverse E/S impacts on society or the environment
- Engagement with companies

DATA SOURCES AND PROCESSING

Pictet Asset Management has selected a range of specialist providers for ESG data to support our firm-wide ESG integration and active ownership activities. Data received from external providers may be complemented by internal research and analysis provided by our Investment teams and ESG specialists.

Pictet Asset Management's main ESG data providers can be found in our Website by following this [link](#).

What are the measures taken to ensure data quality?

Quality issues trigger automated alerts, which are followed by manual reviews from our data and ESG analysts/specialists, and where necessary, by engagements with third-party ESG data providers. Additionally, we perform momentum analysis on different ESG data to better identify risks and opportunities.

How is data processed?

ESG data are updated daily in our internal data warehouse and are made available to our investments teams through various systems, such as our internal ESG Scorecard, Portfolio Management System, and Tableau dashboards.

What proportion of data is estimated?

Although we prioritise reported data over estimated data, we do rely on estimations to some extent, where reported data are not available. Data reported by companies and regulatory authorities are prioritised over estimated data from external providers and ranked higher in terms of reliability for investment and active ownership activities.

The proportion of estimated data varies depending on the ESG indicator. For example, for GHG emissions scope 1 and 2, around 80% of the data is reported, while the majority of scope 3 emissions are estimated.

**LIMITATIONS TO
METHODOLOGIES
AND DATA**

Any limitations to the methodologies

Key limitations to our methodologies may include a lack of data coverage. Our methodologies are informed by reliable sources gathered from diverse reputable third-party research providers that are experts in their areas.

In cases where the information from third-party providers is deemed incorrect or incomplete, we retain the right to engage with them or to deviate, on a case-by-case basis.

How such limitations do not affect the objective of the fund

ESG data availability is continually improving, and we are leveraging more and more on our data using information from different providers. However, certain data may not be available for all issuers in the fund or benchmark, which means that ESG indicators provided at the portfolio level may not be fully representative. Therefore, it is important to consider coverage ratios when interpreting the levels of ESG indicators. At the portfolio and index level, an ESG indicator is considered significant if we have coverage on more than 50% of eligible assets (in-scope instruments).

Actions taken to address such limitations

We address such limitations on constantly monitoring potential new relevant data set from providers.

DUE DILIGENCE

Service providers are subject to rigorous due diligence supervised by the Pictet Group ESG Data Committee and covering topics such as review of their business model, research process, technical expertise, data coverage, quality assurance mechanisms, and prevention of conflicts of interests. In addition to external ESG data, the Committee approves and oversees the development of in-house ESG data infrastructure and the annual ESG data budget.

The existing list of ESG Data providers is subject on an ongoing revision for data quality, coverage and other attributes. As a consequence, if the outcomes of the due diligence are not satisfactory and we face repetitive data quality issues we can close the contract we have in place with them.

More information about the external data sources used is available upon request.

Our due diligence process of issuers covers the following points:

- The clarity and robustness of the issuer's long-term strategy.
- The functioning and caliber of governance structures and effective leadership.
- The financial strength and performance of issuers and the fair valuation of underlying securities.
- Sustainability risks & opportunities and adverse impacts of potential investments on society and/or the environment.

ENGAGEMENT POLICIES

We consider it our fiduciary duty to engage selected corporate issuers in order to positively influence a company's ESG performance and to protect or enhance the value of our clients' investments. We press management to adopt appropriate policies, practices and disclosure in line with established best practice but focus on those that lag behind or where accidents or events bring to light structural weaknesses in their governance and/or management of environmental and social issues. Interaction with issuers take the form of one-to-one discussions, shareholder/bondholder meetings, investor roadshows and/or conference calls. The objectives of these interactions are to assess an organization, monitor that their strategy is being implemented in line with our expectations and ensure that issuers are on track to meet their goals and objectives.

We engage on behalf of our long only, managed equity and debt holdings. Our engagement activities include a combination of targeted in-house-led discussions, collaborative institutional investor initiatives, and third-party engagement services.

Collaborative initiatives we participate in include Ceres Valuing Water Finance, Nature Action 100 and FAIRR.

Engagement targets may be identified independently by investment teams, or as part of our Group Engagement Focus program, a group-level engagement initiative that focuses on issues such as climate change, nature, long-termism and breaches of global norms.

Our [Pictet Climate Action Plan](#), which includes our commitment to net zero by 2050 as well as interim science-based targets, also drives some of our engagement activity as we use active ownership to make progress against our climate targets. More detailed information on engagement and proxy-voting policies activities can be found in [Pictet Asset Management's Responsible Investment Report](#) and [Responsible Investment Policy](#).
