

Key Investor Information

This document provides you with key investor information about the Compartment. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in the Compartment. You are advised to read it so that you can make an informed decision about whether to invest.

Pictet - Ultra Short -Term Bonds EUR

(the "Compartment") is a compartment of Pictet (the "Fund").

I (the "Share Class") - ISIN LU2009036927

The Fund is managed by Pictet Asset Management (Europe) S.A. (the "Management Company"), part of the Pictet group

OBJECTIVES AND INVESTMENT POLICY

Objective

To preserve the value of your investment, while achieving a higher return than money market rates.

Reference Index

Euro Short Term Rate (€STR). Used for performance measurement.

Portfolio Assets

The Compartment mainly invests in short-term investment grade corporate and government bonds, and money market instruments, that are either denominated in Euros (EUR) or typically hedged to this currency (meaning investments have little or no exposure to currency risk). The compartment invests worldwide and can invest across any sector.

Derivatives And Structured Products

The Compartment may use derivatives to reduce various risks (hedging) and for efficient portfolio management, and may use structured products to gain exposure to portfolio assets.

Compartment Currency

EUR

Investment Process

In actively managing the Compartment, the investment manager uses a combination of market and issuer analysis to build a diversified portfolio of securities it believes offer the best combination of risk-adjusted returns relative to the benchmark, high liquidity and protection against interest rate changes. The Compartment's active management approach uses strict risk controls. The investment manager may invest in issuers with any environmental, social, and governance (ESG) profile. It may engage with issuers in order to positively influence ESG practices, SFDR product category Article 6. The portfolio composition is not constrained relative to the benchmark, so the similarity of the Compartment's performance to that of the benchmark may vary.

Terms to understand

Bonds, investment grade bonds Securities that represent an obligation to repay a debt, along with interest. Investment grade bonds generally pay lower interest rates but are considered likely to make all scheduled payments.

Derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Money market instruments Financial instruments designed to provide stable value, interest and a very low risk of loss, as well as being readily convertible into cash.

Structured products Securities similar to derivatives, but with defined risk or performance characteristics.

Other characteristics

Designed for investors who understand the risks of this compartment and plan to invest for one year or more. This is an accumulation share class, meaning any income earned is retained in the share price. Orders to buy, switch or redeem shares are ordinarily processed on any day that is a full bank business day in Luxembourg.

RISK AND REWARD PROFILE

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures.

The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Credit risk:** sudden losses may occur when issuers of debt securities default on their payment obligations.
- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.

CHARGES

The charges you pay are used to cover the costs of running the Compartment, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The **entry, conversion and exit charges** shown are maximum figures. In some cases you may pay less. You can find this out from your financial adviser or fund distributor.

The **ongoing charges** figure is based on expenses for the period ending on 31 December 2023. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Compartment when buying or selling units/shares in another collective investment undertaking.

For more information on charges, please refer to the "Fund Expenses" section of the Fund's prospectus available on assetmanagement.pictet

One-off charges deducted before or after you invest
